

“Why Nursing?”

Ever since I was a little girl I knew I wanted to be a nurse. I’ve always been one to care for others and tried to help people in any way that I could. As I grew older I couldn’t think of a better way than nursing. Working through this pandemic felt like I was being tested, but no matter how difficult things got or how overwhelmed I felt I knew my heart was in the right place. I’ve learned so much in this last year. Not just in the nursing profession but about myself as well. We made it through when at times we were unsure that we could because of the toll this pandemic took on us; but we made it. One of the many things that I have learned is; one can’t control how one has been treated or the life that one has lived. But if I could be good to them in their last minutes of life then I have done my part. That alone for me is very rewarding. I am excited and looking forward to what this program has in store for me and I am ready to learn!
