

Why nursing?
Shelby Sylvester

The reason why I chose to go into the nursing profession is, besides the cliché answer of “I want to help people”, because the human body and the functionality of it fascinates me along with how it all interacts to make us what we are. In the future I do plan to further my education by going on to get my BSN as well as my DNP and specialize in whatever I fall in love with through my journey in nursing school. I really look forward to starting my journey into my nursing career and gaining as much knowledge as I possibly can as well as helping those in my community to the best of my abilities!
