

Covenant School of Nursing
Disciplinary Action Summary Assignment
Instructional Module 2

Student Name: Samantha Ramos Date:10/10/21

DAS Assignment # 2 (1-4)

Name of the defendant: **Jerri Love Fulbright**
739289

License number of the defendant:

Date action was taken against the license: **5/14/2013**

Type of action taken against the license: **Revoked**

Use the space below to describe the events which led to action taken against the license. If multiple charges were in play, be sure and cite them, e.g. drug diversion, HIPAA violation, abandonment, forfeiture on student loans, etc.

Charge I: Jerri Fulbright failed to give a proper nursing intervention to a patient that led to their death.

Charge II: Mr. Fulbright administered an excessive amount of Meclozine to a patient with CVF when the patient had respiratory difficulty.

Charge III: Mr. Fulbright instructed a family member to administer insulin that was prescribed to a relative, this was without the physician's knowledge.

Use the space below to provide a description of measures you think could have prevented any action being taken against the license and/or would have prevented harm to the patient, if harm occurred. Consider which universal competencies were violated.

The actions that could have prevented a situation like this is doing the nursing intervention as taught to prevent respiratory complications, then administering the appropriate and prescribed medication amount, then following doctors' orders and not giving the insulin that was not the patients.

Use the space below to describe what action you think a prudent nurse would take as the first to person to discover the event described, in other words, you are the one who discovers the patient has been harmed by the nurse or you have discovered the impairment or criminal activity cited in the disciplinary action.

If I discovered that Jerri Fulbright did not give a proper intervention, gave wrong amount and administered medication that was not the patients, I would call the nurse manger in charge of the hospice care that he failed to do right by nursing and by the patient, this is a death that could have been avoided.
