<p>Comments: I failed to ask the patient the 4 P's prior to administering the medications but I did it after I have given my medication and have changed my CVAD dressing. I have also done my medication administration documentation at the end of my CVAD dressing change instead of doing it right after I have given my medication. I also failed to assess the ventrogluteal site for any sign of bruises or redness. I also did not educate my patient right away regarding the side effects that she might feel after taking the medications. Instead, I educated her at the end after I have finished my medication and CVAD change documentation just before I left my patient's room.</p>
