

Covenant School of Nursing
Disciplinary Action Summary Assignment
Instructional Module 2

Student Name: Madeline Eckert Date: 10-18-2021 DAS Assignment # 3 (1-4)

Name of the defendant: Michelle Rene Gray License number of the defendant: RN 669442

Date action was taken against the license: 02/28/2018

Type of action taken against the license: Remedial Education

Use the space below to describe the events which led to action taken against the license. If multiple charges were in play, be sure and cite them, e.g. drug diversion, HIPAA violation, abandonment, forfeiture on student loans, etc.

Gray misappropriated two vials of Promethazine 25 mg belonging to the facility or patients thereof, or failed to take appropriate precautions to prevent such appropriations.

Use the space below to provide a description of measures you think could have prevented any action being taken against the license and/or would have prevented harm to the patient, if harm occurred. Consider which universal competencies were violated.

Gray accessed the pyxis and states she did not take any medication, claiming she was not knowledgeable about the pyxis. But two vials of promethazine went missing on her watch. She violated the safety and security universal competency by failing to correctly administer drugs.

Use the space below to describe what action you think a prudent nurse would take as the first to person to discover the event described, in other words, you are the one who discovers the patient has been harmed by the nurse or you have discovered the impairment or criminal activity cited in the disciplinary action.

A prudent nurse would report the event to a his or her supervisor or charge nurse.
