

Maria Padilla

1. How did you feel throughout the time that you were watching the video? **Sad and Happy a mixture of both. But most importantly guilty of some of the things I take for granted like my health.**

2. Give a description of Claire's condition and identify the main problems that you identified? **Not able to breathe on her own**

3. Based on your observations, what were her clinical manifestations and how would you explain these clinical manifestations?
Productive cough because her body overly produces mucous.

4. What specific nursing interventions would you want to take into consideration to provide for this patient's unique care needs?
Hand Hygiene to decrease infection
Neutropenia precaution
TCDB
CPT to help remove mucous

5. What other members of the care team should you consider important to achieving good care outcomes?
Respiratory to help with her treatments
House keeping to available prevent infection
Dietary to help maintain adequate nutrition

6. What financial challenges did this family face because of Claire's condition?
Increase premiums at higher rate because she spent majority of her time in the hospital

7. What did you learn from this experience?
Don't take life for granted live life for what it is.

8. How will you apply what you learned by watching this video to your clinical practice?
How to be engaged and help them cope with their illness.

9. Are there other significant words that Claire or her mother shared that impacted or inspired you? **Life is not always goes as planned; Live life for the moment and not by what is currently happening.**
10. Is there anything else you would like to include in your reflection of this experience? **Be more open minded and learn to be more gracious.**
