**Instructional Module 6
Obstetrics Community Clinical Experience**

Community Site: Dr. Blann

1. What did you observe during the day? Were there any specific procedures that were able to participate in or observe?

Today, I just took some blood pressures and got to find and listen to the fetal heart rate. I also got to observe a couple of ultrasounds.

2. What was the best/most interesting part of the experience?

I think the most interesting part was getting to see the different types of patients there are. They all have different backgrounds. The best part was getting to see the parents' reactions to hearing the heartbeat.

3. Is a community nursing position something that you would consider working in? Why or why not?

I think I would consider working in this position because it was repetitive and seemed like a calm and low stressful job.

4. Do you feel like this community site met the needs of the population they serve? Why or why not?

I think they met the needs. I think this because they made sure their patients had the right information and resources to help with the journey of the pregnancy.

5. Did you witness patient teaching? What general things were taught to this population? Do you feel that patient teaching in this community site was adequate? Why or why not?

Yes, I did witness patient teaching about birth control specifically. They also taught the patients how to handle situation when the mom was uncomfortable such as using Tylenol, lying on the side, staying hydrated, and going for walks. I think the teaching was adequate because the patients even told the nurse all the things they were taught. This made me realize that teaching was effective.
