

IM8 : CPE Pre-briefing :

Learning Outcomes:

1. Identify a patient in cardiac arrest (initial student on the scene).
2. Respond to a cardiac arrest with a Teamwork-oriented mindset.
3. Administer effective chest compression & ventilation.
4. Administer medication accurately per ACLS algorithm.
5. Document the code blue accurately on the assigned code blue sheet.
6. Ensure the ACLS algorithm is followed & correct identification of shockable rhythm.
7. Give a thorough report to receiving nurse via phone.

IM 8 : INSTRUCTIONS FOR CPE-MOCK CODE : December 2, 2021

Roles for CPE

| Roles | Performance Expectations |
|--------------|---|
| Charge | Can read the algorithm, knowledgeable, confident, assertive |
| Medications | Pushes "right" meds, calls them out, flushes after each administration |
| Airway | Correct rate, appropriate volume, switches in a timely manner |
| Compressions | Correct rate, allows chest recoil, switches in a timely manner |
| Scribe | Records accurate information, at the very least records IV pushes, rhythms, defib, update the charge & medication |
| Runner | Locates requested items in a timely manner, inform the physician & family, switches out with compressor when fatigued |
| Whole Team | Will all work together to perform post-code care or transfer to the ICU |

CPE: Debriefing - Each group will reflect the overall performance in the simulation of Mock Code Blue.

After the simulation, debriefing will take place:

- a. Roles performance
- b. Leadership
- c. Teamwork
- d. General code response
