

D.O.B. _____

Gestational Age _____ Adjusted Gest. Age _____

Birthweight _____ lbs. _____ oz. / _____ grams

Current weight _____ lbs. _____ oz. / _____ grams

APGAR at birth: _____

Primary Diagnosis:

Respiratory Distress in the Newborn

Premature

Normal CXR

Abnormal CXR

- * Apnea of Prematurity
- * Sepsis
- * Intraventricular Hemorrhage
- * Hypoglycemia
- * Hypothermia
- * Narcosis

- * Respiratory Distress Syndrome (RDS)
- * Transient Tachypnea of the Newborn (TTN)
- * Pneumonia
- * Pneumothorax
- * Congenital Abnormality

Not Premature

Meconium Aspiration

- * Meconium in Amniotic Fluid

Infectious

- * Sepsis
- * Pneumonia

Non-Infectious

- * Respiratory Distress Syndrome (RDS)
- * Transient Tachypnea of the Newborn (TTN)
- * Pneumothorax
- * Congenital Abnormality
