Comments:

The following errors were made during my video:

1. I should have called on my vocera for hand sanitizer when I realized I did not have what I needed
2. I had difficulty with donning my sterile gloves and broke sterilization
3. I missed cleaning the table prior to doing my sterile process
4. I turned my back on the sterile field when I was placing the dressing on the CVAD
5. I should have placed my table prior to the sterilization process
6. I did not teach the patient how to care for the CVAD
7. I may have done the call light differently since I had to reach over the patient to get it

I put unmet on the 4 above areas of asepsis even though I called myself out on some of these things in the video.
