

## IM 2 Simulated Patient Clinical Video Grading Rubric

Student Name: Olivia Ledgerwood

Video: 1

Date: 12/11/21

There are three (3) ways to receive credit for the video:

1. Perform the scenario with all critical elements in each area of the grading tool
2. Verbalize a breach or mistake in real time and provide the nursing intervention to correct the breach or mistake then proceed with the video
3. When reviewing the video, honestly evaluate the nurse. Recognize all (if any) breaches or mistakes, record them as "unmet" and provide a nursing intervention to correct the breach or mistake

Universal Competency	Critical Elements	M	U
Safety (physical and emotional)	Introduce self	X	
	Identify patient (2 patient identifiers)	X	
	AIDET	X	
	Allergies	X	
	4 P's	X	
	Fall Bundle	X	
	<b>Medication Administration:</b> Medication, dosage, route, reason, assessment of route site(s), medication delivery equipment (IV pump, etc.)	X	
Critical Thinking	<b>Assessment:</b> See NII for critical elements pertaining to selected assessment(s)	X	
	<b>Procedure</b> Assess, Plan, Implement, Evaluate (APIE)  (Selection of appropriate equipment, time management, organization, etc.)	X	
Standard Precaution	<b>Asepsis:</b>		
	Hand hygiene		X
	Don and change gloves (as indicated)	X	
	Clean equipment (stethoscope, pulse ox, bedside table, med tray, etc.)		X
	Sterile procedure	X	
	Medication preparation	X	
	Medication delivery		X
Documentation	<b>Teach Patient:</b>	X	
	Medication	X	
	Procedure	X	

	Scan patient	X	
	Scan medication	X	
	Save med documentation	X	
	Document assessment findings	X	
	Document procedure	X	
	Save all documentation	X	
Human Caring and Relationship	Respect, active engagement, authenticity, empathy, etc.	X	
Professional Role Performance	Appearance, preparation, behaviors, resource management, etc.	X	
<p>Comments:</p> <p>I forgot to do hand hygiene when I walked into the room and forgot to clean the pulse ox before using it, but I caught myself later on for both. When putting the medication into the site, I was not holding onto the syringe correctly and the needle moved which would cause a lot of pain and harm on the patient. In addition, when opening the gloves for CVAD one of the gloves barely touched the 1 inch border causing it to be contaminated, but since it was on the inside, we were able to continue.</p>
