

IM 2 Simulated Patient Clinical Video Grading Rubric

Student Name: Aubree Jones

Video: 1

Date: 12/11/21

There are three (3) ways to receive credit for the video:

1. Perform the scenario with all critical elements in each area of the grading tool
2. Verbalize a breach or mistake in real time and provide the nursing intervention to correct the breach or mistake then proceed with the video
3. When reviewing the video, honestly evaluate the nurse. Recognize all (if any) breaches or mistakes, record them as "unmet" and provide a nursing intervention to correct the breach or mistake

Universal Competency	Critical Elements	M	U
Safety (physical and emotional)	Introduce self	M	
	Identify patient (2 patient identifiers)	M	
	AIDET	M	
	Allergies		U
	4 P's	M	
	Fall Bundle	M	
	Medication Administration: Medication, dosage, route, reason, assessment of route site(s), medication delivery equipment (IV pump, etc.)	M	
Critical Thinking	Assessment: See NII for critical elements pertaining to selected assessment(s)	M	
	Procedure Assess, Plan, Implement, Evaluate (APIE) (Selection of appropriate equipment, time management, organization, etc.)	M	
Standard Precaution	Asepsis:	M	
	Hand hygiene	M	
	Don and change gloves (as indicated)	M	
	Clean equipment (stethoscope, pulse ox, bedside table, med tray, etc.)	M	
	Sterile procedure		U
	Medication preparation	M	
	Medication delivery	M	
Documentation	Teach Patient:	M	
	Medication	M	
	Procedure	M	
	Scan patient	M	
	Scan medication		U
	Save med documentation		U
	Document assessment findings		U
	Document procedure		U
	Save all documentation	M	
Human Caring and Relationship	Respect, active engagement, authenticity, empathy, etc.	M	
Professional Role Performance	Appearance, preparation, behaviors, resource management, etc.	M	

Comments: I turned my back on my medication while going to put something down. Next time I should keep them in sight. Forgot to scan medication before administering, next time I would scan it while the other nurse checks it. This is counted as my documentation so it is critical. Forgot to throw syringe in sharps on camera, next time I would make sure to do that as soon as I am done with it instead of placing it in my med box. Forgot to ask allergies before procedure would be sure to do so as soon as I come into the room and identify patient next time because it is critical also. Forgot hand sanitizer before first gloving, so sterile field was ruined. Next time I would use the hand sanitizer first. Hand fell below waist on the way to the bed, which is a sterility violation, next time gloves will be changed.
