

IM 2 Simulated Patient Clinical Video Grading Rubric

Student Name: Madison Billingsley Video: 2 Date: 12/16/21

YOUTUBE video link-

<https://youtu.be/yqHXu-i2lgM>

There are three (3) ways to receive credit for the video:

1. Perform the scenario with all critical elements in each area of the grading tool
2. Verbalize a breach or mistake in real time and provide the nursing intervention to correct the breach or mistake then proceed with the video
3. When reviewing the video, honestly evaluate the nurse. Recognize all (if any) breaches or mistakes, record them as "unmet" and provide a nursing intervention to correct the breach or mistake

Universal Competency	Critical Elements	M	U
Safety (physical and emotional)	Introduce self	M	
	Identify patient (2 patient identifiers)	M	
	AIDET	M	
	Allergies	M	
	4 P's	M	
	Fall Bundle		U
	Medication Administration: Medication, dosage, route, reason, assessment of route site(s), medication delivery equipment (IV pump, etc.)	M	
Critical Thinking	Assessment: See NII for critical elements pertaining to selected assessment(s)		U
	Procedure Assess, Plan, Implement, Evaluate (APIE) (Selection of appropriate equipment, time management, organization, etc.)	M	
Standard Precaution	Asepsis:		
	Hand hygiene		U
	Don and change gloves (as indicated)	M	
	Clean equipment (stethoscope, pulse ox, bedside table, med tray, etc.)	M	
	Sterile procedure		U
	Medication preparation	M	
Documentation	Medication delivery		U
	Teach Patient:		
	Medication	M	
	Procedure	M	
	Scan patient	M	
	Scan medication	M	
	Save med documentation	M	
	Document assessment findings	M	
	Document procedure	M	
Save all documentation	M		
Human Caring and Relationship	Respect, active engagement, authenticity, empathy, etc.	M	
Professional Role Performance	Appearance, preparation, behaviors, resource management, etc.		U

Comments: I was unprepared going into the patients room and left the CVAD kit and Tdap vaccine page in the medication room. Next time I will be sure to remain professional and gather those things before entering the room. I failed to check the respirations before starting to administer morphine, I caught myself right before the administration but next time I will remember to count respirations before beginning. I also did not aspirate the

central line for blood return, this was a big safety risk considering the catheter could not be placed in the right location. I will always remember to aspirate to ensure the catheter is located correctly. I should have put up the railing as soon as I got done administering the morphine, this is a big patient safety risk that I missed. There was also another time I walked away with the railing down, I will remember to never do that again as it puts the patient at risk. I failed to maintain patient modesty after the morphine injection and should have covered her up right after I was finished at the site. Next time, I will remember to document and save after every assessment, instead of waiting until the end. I failed to use hand hygiene after touching the trash can, which is gross, I will not do that next time. During the sterile procedure, my hand dropping below my waist twice. By doing that, I broke sterility and I would need to grab new sterile gloves before continuing the dressing change. Lastly, I did not check the capillary refill in the feet. By not doing this, I could have missed signs of bad circulation to the foot. I will remember to check capillary refill.
