

Covenant School of Nursing

Disciplinary Action Summary Assignment

Instructional Module 2

Student Name: Aubree Jones

Date: 12/19/21

DAS Assignment # 3

Name of the defendant: Brandon J. Faunce

License number of the defendant: 761174

Date action was taken against the license: 11/08/2016

Type of action taken against the license: Revoked

Use the space below to describe the events which led to action taken against the license. If multiple charges were in play, be sure and cite them, e.g. drug diversion, HIPAA violation, abandonment, forfeiture on student loans, etc.

In March and June of 2016 he abused his power as a caregiver, drugged, and sexually assaulted a patient. He was reported, and arrested so he missed his summon to talk to the board of nursing on his behalf so the license was revoked. It was determined that he mentally and physically harmed a patient, and could have caused long term trauma for the patient. He was deemed unfit to practice nursing.

Use the space below to provide a description of measures you think could have prevented any action being taken against the license and/or would have prevented harm to the patient, if harm occurred. Consider which universal competencies were violated.

There is not much that could have been done to stop this from happening. Strong background checks, cameras, and catching him before harm was done to a patient would have been the only way. This man had horrible intentions, and unfortunately no one caught on to him before someone was harmed, but after the first time I think staff should have noticed a change in the patient depending on mental status. There is no telling how many people he got away with doing this to.

Use the space below to describe what action you think a prudent nurse would take as the first to person to discover the event described, in other words, you are the one who discovers the patient has been harmed by the nurse or you have discovered the impairment or criminal activity cited in the disciplinary action.

If I discovered he was harming one of my patients after the fact I would report it immediately to my Director of Nurses because it is a very serious situation that needs further actions taken, such as calling the police. If I caught him in the act I would yell for help, while also trying to get the patient out of harms way if at all possible.
