

I want to be a nurse because I have always wanted to pursue a career in the health field, as my passion has always been to care for people, families and be a support person in a time of need. I am intrigued by the holistic way nurses care for people rather than focusing on only one aspect of a focused system of care. I want to be a nurse and be able to serve families in the community, and I look forward to the academic challenge that comes along with becoming and being a nurse. I have always admired nurses in their strength and ability to make a difference in their patient's lives, and having the opportunity to become one myself is a privilege.
