

Why Nursing:

I want to go back into a career that provides me the opportunity to more actively involved with people and my community overall. At the same time, I know what I don't want, which is a career centered around staring at a computer screen and sitting at a desk all day. I believe that by pursuing nursing I will be able to provide the help and care that I enjoy providing to other people and opportunities for me to grow in the medical field overall. Ultimately, my goal is to have responsibilities related to instruction/teaching and other forms of leadership.
