

Hi, my name is Guadalupe Carrillo. I want to become a nurse because since I was a little girl. I loved taking care of my siblings when they had a small accident. When they would scrap a knee or had small cuts I would love making them feel better. I also had an aunt who is an RN now that went to this program encouraged me a lot. But as I grow older I had other careers in mind. When I graduated high school I was debating on going into nursing or physical therapy school. So I ended up going to medical assistant school, to see if I liked it or not. I ended up in working in an orthopedic surgeon office and really loved working there. I always thought of going back to school but never had the chance to. The doctor I worked for encouraged me a lot and ended up going to going back to school and starting pre-requisites for nursing school. Well that brings me here, very excited to meet everyone and start my journey to become a nurse.
