

Covenant School of Nursing
Disciplinary Action Summary Assignment
Instructional Module 2

Student Name: Marin Duriex

Date: 5/6/2022

DAS Assignment # ____1____ (1-4)

Name of the defendant: Rasheedah Clark

License number of the defendant: 224389

Date action was taken against the license: Feb, 12, 2019

Type of action taken against the license: REVOKED

Use the space below to describe the events which led to action taken against the license. If multiple charges were in play, be sure and cite them, e.g. drug diversion, HIPAA violation, abandonment, forfeiture on student loans, etc.

According to the disciplinary committee, Clark had her license revoked because she failed to appear to her original charges, retention of her license. This was a DEFAULT ORDER. The retention of her license was due to the fact that she had 3x the amount of narcotics sent to a pharmacy and tried to deceive the pharmacy.

Use the space below to provide a description of measures you think could have prevented any action being taken against the license and/or would have prevented harm to the patient, if harm occurred. Consider which universal competencies were violated.

I think that Clark's first charge, because it was her purposely trying to deceive the pharmacy was her fault. So if she would've not tried to gain extra narcotics, she would still have her license. The revoking of her license was due to the failure to show up to her hearing. Again, an easy fix on Clark's part.

Use the space below to describe what action you think a prudent nurse would take as the first to person to discover the event described, in other words, you are the one who discovers the patient has been harmed by the nurse or you have discovered the impairment or criminal activity cited in the disciplinary action.

I would tell her to fess up to the pharmacy and say it was indeed a mistake. If she did not, I would call the pharmacy and tell them to check the order with the providing doctor. This would ensure that the right measures were taken.
