The nurse is practiced nursing care while impaired with controlled substances or chemical dependency. This nurse also has been convicted of impaired driving.

The nurse should have look for help before it gets too serious with the use of drugs. This nurse should have look for a therapist to help her or a drug rehab center. I think that this nurse violated critical thinking, professional role performance in the universal competencies. I also think that driving while impaired is very dangerous because it doesn't harm the patient in the hospital, but this nurse could have cause a very serious accident and could put a person into the hospital.

If I know that this nurse was practicing nursing care while impaired, I would go tell her to report it to the charge nurse by herself, and I would reported to the charge nurse if she does not want to report it and I would have take it up to the chain of command if this issue is still not being taken care of because this unsafe for the patient and what I learn is patient safety is always one of our top priorities in nursing.
