

Covenant School of Nursing  
Disciplinary Action Summary Assignment  
Instructional Module 2

Student Name: Hans Burda

Date: 5/12/2022

DAS Assignment # 2

Name of the defendant: Abrian, Myrna Mosquera

License number of the defendant: RN 508430

Date action was taken against the license: 11/10/2020

Type of action taken against the license: Warning with Stipulations

*Use the space below to describe the events which led to action taken against the license. If multiple charges were in play, be sure and cite them, e.g. drug diversion, HIPAA violation, abandonment, forfeiture on student loans, etc.*

On January 6, 2020, Abrian withdrew a medication for a patient that was an excess dosage of the physician's order. Abrian also falsified documentation stating that the correct amount was administered when the excess amount was actually given.

*Use the space below to provide a description of measures you think could have prevented any action being taken against the license and/or would have prevented harm to the patient, if harm occurred. Consider which universal competencies were violated.*

Ensuring the 7 rights of medication multiple times could have prevented this occurrence. Abrian claims that the mistake was made because she was in a hurry and did not pay attention to the prompt screen in the pyxis. Making sure to take our time rechecking the name and dose of the medication at the pyxis and at the bedside could have prevented this error. Not falsifying medical records is a matter of integrity.

The universal competencies that were violated includes safety/security and documentation.

*Use the space below to describe what action you think a prudent nurse would take as the first to person to discover the event described, in other words, you are the one who discovers the patient has been harmed by the nurse or you have discovered the impairment or criminal activity cited in the disciplinary action.*

If I was the nurse that made the mistake of administering the wrong dosage of medication, I would follow the correct procedure of admitting the medication error instead of falsifying documentation.

If I was the nurse that witnessed a medication error and false documentation, I would report the incident up the chain of command.
