

Pediatric Case 2: Sabina Vasquez

Documentation Assignments

1. Document your initial focused assessment of Sabina Vasquez.

Sabina is having an asthma exacerbation, my focused assessment consisted of evaluating her respiratory system, oxygen saturation, and respiratory rate.

2. Identify and document key nursing diagnoses for Sabina Vasquez.

Ineffective airway clearance, impaired gas exchange, ineffective breathing pattern, acute pain

3. Referring to your feedback log, document the nursing care you provided and Sabina Vasquez's response.

I identified the patient and family present, raised head of bed, performed respiratory assessment, assessed O2 sat, and bp, gave pt a comfort toy, administered medication and O2.

4. Document the patient teaching that you would provide for Sabina Vasquez and her family before discharge.

Patient teaching about triggers that cause exacerbation. Education about medication such as albuterol and antibiotics, route dose and frequency and side effects. Teaching about completing the full course of antibiotics, regardless if she feels better. And encourage no smoking in the house.
