\_\_\_3\_\_\_ (1-4)

Date: 05/20/2022

DAS Assignment #

Name of the defendant: Vanessa Ann Ash

License number of the defendant: 706840

Date action was taken against the license: June 16<sup>th</sup>, 2015

Type of action taken against the license: Revoked

*This nurse administered Versed IV push to the patient without a physician's order and end up injure the patient because of adverse drug reaction. After that, this nurse did not document about the IV push medication, so it is false documentation and inaccurate medical records.*

*I think that this nurse could have prevented this by talking to the physician before administering or thinking of administered any medication that is not on the orders because we learn in school that we need a physician order to administer any medication. The universal competencies that this nurse violated is safety and security, communication, documentation, and critical thinking.*

*If I discover this event, I will immediately notify the charge nurse and the physician because Versed could cause a patient to slow and stop breathing and it could be very dangerous for the patient.*
