

IM 2 Simulated Patient Clinical Video Grading Rubric

Student Name: [Megan Hennig](#)

Video: [2](#)

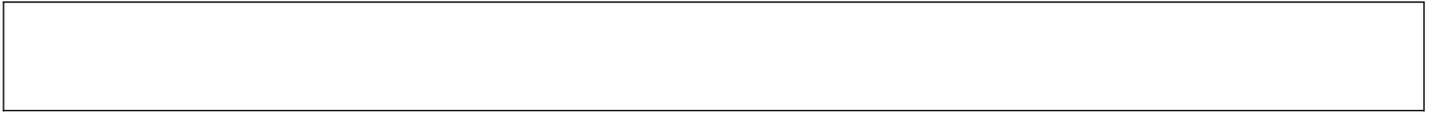

Date: [05/27/2022](#)

There are three (3) ways to receive credit for the video:

1. Perform the scenario with all critical elements in each area of the grading tool
2. Verbalize a breach or mistake in real time and provide the nursing intervention to correct the breach or mistake then proceed with the video
3. When reviewing the video, honestly evaluate the nurse. Recognize all (if any) breaches or mistakes, record them as “unmet” and provide a nursing intervention to correct the breach or mistake

Universal Competency	Critical Elements	M	U
Safety (physical and emotional)	Introduce self	M	
	Identify patient (2 patient identifiers)	M	
	AIDET	M	
	Allergies		U
	4 P's	M	
	Fall Bundle	M	
	Medication Administration: Medication, dosage, route, reason, assessment of route site(s), medication delivery equipment (IV pump, etc.)	M	
Critical Thinking	Assessment: See NII for critical elements pertaining to selected assessment(s)	M	
	Procedure Assess, Plan, Implement, Evaluate (APIE) (Selection of appropriate equipment, time management, organization, etc.)	M	
Standard Precaution	Asepsis:		
	Hand hygiene	M	
	Don and change gloves (as indicated)	M	
	Clean equipment (stethoscope, pulse ox, bedside table, med tray, etc.)	M	
	Sterile procedure		U
	Medication preparation	M	
Documentation	Medication delivery	M	
	Teach Patient:		
	Medication	M	
	Procedure		U
	Scan patient	M	
	Scan each medication & acknowledge/accept	M	
	Document assessment findings	M	
Document procedure	M		
Human Caring and Relationship	Respect, active engagement, authenticity, empathy, etc.	M	
Professional Role Performance	Appearance, preparation, behaviors, resource management, etc.		U

Comments: [After administering the morphine I dispose of all syringes into the sharp's container. For video purposes, I placed them into the bin. Before starting the CVAD dressing change, I would ask about allergies again being specific to latex and chlorohexidine. While performing the dressing change my sterile field was first contaminated when I was trying to move the bedside table. The kit fell forward while moving the table. I would get rid of that kit and begin over with a new one. When reaching into the sterile field for my swab, I contaminated the one-inch border. I would get a new CVAD kit and restart. I will wipe down the lumen once during the cleaning part of the procedure. When finishing I need to teach the patient not to get the dressing wet, do not touch it and to let me know if it begins to bother them. I will refrain from saying the words "perfect" and "whoops."](#)
