

Ethical Analysis: #2 pg.88 Patient Care book

1. Problem- Sandy was talking to her friend about a patient not knowing her family was around.
2. Solutions- Do not talk about a patient, do not say the patients name, do not assume stuff about patient when you do not know the information about it.
3. Best solution- Do not talk about the patient
4. Defending- It would have all been prevented if Sandy did not talk about the patient to her friend. If she did not talk about the patient, then there would not have been a complaint and everyone would have went on with their day.
