

## Guided Reflection Questions for Medical Case 1: Kenneth Bronson

### Opening Questions

How did the scenario make you feel?

-It took me a few times to get the hang of it all so I was originally feeling frustrated that I couldn't score an 80. Once I saw my mistakes I was able to correctly care for this patient and see their condition improve as I continued interventions.

### Scenario Analysis Questions\*

**PCC, EBP** What signs and symptoms led you to the conclusion that Kenneth Bronson was experiencing an allergic reaction?

-throat began to swell, o2 sat dropped, hr went up

**PCC, EBP** Discuss the differences between mild, moderate, and severe anaphylactic reactions.

mild/moderate are things such as itching, rash, tingling, swelling of eyes and face while severe is difficulty breathing, wheezing, swelling of tongue

**EBP/S** Discuss the importance of follow-up assessments post-reaction.

-rebound reaction can happen and return in a few hours

### Concluding Questions

What further needs does Kenneth Bronson have at the end of the scenario that future nursing care should address?

-Education on how to stop smoking and also education on different signs of anaphylaxis

Reflect on how you would communicate with family members in an emergency situation if they were present at the bedside.

-Calmly explain the situation and if not cooperating then asking them to step out into the hall

After completing the simulation and reflecting on your experience, what would you do differently (or the same) for the patient experiencing acute respiratory distress?

-I would keep most things the same just brush up on the liters for each face mask

How could you prepare for clinical to anticipate potential patient emergencies?

-Go over emergency medications that are given during situations like this
