## School Nurse Experience Reflection Questions

1. How has your view of the student population changed?

- The staff have a great impact on student especially during the development stages.

2. How has your view of the school nurse role changed?

-Must be flexible, able to adapt and collaborate with public health.

3. What surprised you about the school nurse experience?

-The school nurse depending on the size of the school has several students to attend to, compared to assigned patients which are usually 4-5.

4. What did you observe during your time there?

-I was able to see a different kind of team effort compared to the hospital. On the floor you have nurses that work with PT, OT and HCP to achieve a goal to improve a patient's health status. as a school nurse you work with teachers and the school counselor to ensure the student is receiving the correct needs to be successful in school.

5. How was your experience different from what you expected?

-yes, I was not sure how the day would go. I was very different compared to the hospital environment I have been used to for the past 4 modules.

6. What are some of the needs/issues related to the health of the school age children that you may not have been aware of?

Some students need special accommodations

7. Please list two developmental stages related to the population that you observed.

-Piaget's preoperational

- concrete operational
