Student Name: <u>Madison Lopez</u>   **Date:** <u>10/26/22</u>

Instructional Module 6
Obstetrics Community Clinical Experience

Community Site: <u>   Dr. Blann office   </u>

1. What did you observe during the day? Were there any specific procedures that were able to participate in or observe?

What I observed today was a variety of OB checkups such as ultrasounds to see how the baby is developing and finding out the sex. I also observed the doctor checking dilation of his patients, an IUD insertion, and a pap-smear.

2. What was the best/most interesting part of the experience?

The best experience I had at the clinic was being able to feel for the position of the baby. I was also taught how to use the Doppler to listen to the heart rate.

3. Is a community nursing position something that you would consider working in? Why or why not?

I would highly consider working in this nursing position. I love the OB world and how fast paced it is. I also enjoyed how close the employees were, they all relied on each other to care for their patients.

4. Do you feel like this community site met the needs of the population they serve? Why or why not?

I do believe this community met the needs of this population. Everyone that came into the clinic all had different needs based on post or antepartum, birth control, and women of different ages. I feel this site easily adapted to everyone that came in.

5. Did you witness patient teaching? What general things were taught to this population? Do you feel that patient teaching in this community site was adequate? Why or why not?

Adopted: October 2016

Instructional Module 6
Obstetrics Community Clinical Experience

I was able to witness patient teaching such as what medications were safe to take during pregnancy. Some general things that were taught included proper nutrition in pregnancy, safe sex practices, and the need for pap-smears and STD screening. I do believe the teaching was adequate because the patients expressed understanding and would use teach-back method.
