Obstetrics Community Clinical Experience**

Community Site: Dr. Zavala\_\_\_\_\_

1. What did you observe during the day? Were there any specific procedures that were able to participate in or observe?

I got to see a pap smear and Nexplanon insertion. A few cervix digital exams. What I saw the most of was just check ups for pregnant ladies, and seeing how their pregnancies were coming along.

2. What was the best/most interesting part of the experience?

The most interesting part for me would be just they difference in the clinic versus the hospital floors. It was busy but because of the setting it felt a little less busy. Also getting to see the Nexplanon insertion was really cool.

3. Is a community nursing position something that you would consider working in? Why or why not?

I would consider it just off the atmosphere. The work seems like something I might see myself doing in the future, but my options still are open. I really enjoyed the oncology clinic I got to visit which was similar to this clinic atmosphere wise.

4. Do you feel like this community site met the needs of the population they serve? Why or why not?

Yes, I feel like Dr. Zavala's office did a great job on meeting their patients needs and I do not think anyone left unsatisfied. She exceled at patient teaching.

5. Did you witness patient teaching? What general things were taught to this population? Do you feel that patient teaching in this community site was adequate? Why or why not?  
Yes, every patient that came in received some kind of teaching. The most I saw in this population was prenatal teaching, and what they should expect during their pregnancy. They were very informative no matter what they were doing.
