Disciplinary Action Summary Assignment  
Instructional Module 2

Student Name: Cheyanne Roberson Date: 10\25\2022  
\_\_\_\_\_ (1-4)

DAS Assignment # 1

Name of the defendant- Amanda Lynn Parker License number of the defendant: 698351

Date action was taken against the license: 14 May 13

Type of action taken against the license: Revoked License

*Use the space below to describe the events which led to action taken against the license. If multiple charges were in play, be sure and cite them, e.g. drug diversion, HIPAA violation, abandonment, forfeiture on student loans, etc.*

Mrs. Parker was charged and her license was revoked for misappropriating a medication called Decadron, a common steroid. Action was taken to give her the ability to write a letter to discuss the accusation. She failed to make an appearance therefore forfeiting her right to discuss the accusation and come to a resolution.

*Use the space below to provide a description of measures you think could have prevented any action being taken against the license and/or would have prevented harm to the patient, if harm occurred. Consider which universal competencies were violated.*

*The supervisor confront led Mrs. Parker about the misappropriating of medication. She confirmed that She in fact was not following protocol with medications. At that time measures could have been taken to resolve issues and turn herself in. When letters were sent to have her speak on the matter, she declined to respond forcing action to be taken on her license. Patient care was clearly not the first goal being that medications were being misappropriated.*

*Use the space below to describe what action you think a prudent nurse would take as the first to person to discover the event described, in other words, you are the one who discovers the patient has been harmed by the nurse or you have discovered the impairment or criminal activity cited in the disciplinary action.*

*I would be inclined to report the issue to my supervisor. My hope would be that the accused would come forward, but my first priority is to my patients and fellow colleagues. I would report the incidence and do whatever is possible to do the right thing. I would also make sure if a patient was involved I did everything possible to provide the best care needed to help that patient.*
