

**Instructional Module 6  
Obstetrics Community Clinical Experience**

Community Site: Dr. Nall

1. What did you observe during the day? Were there any specific procedures that were able to participate in or observe?

I was able to observe a lot of charting done by the nurse as well as Dr. Nall and his interactions and teachings with different patients. I do not do any procedures but for the whole day I was the second person in the room for Dr. Nall and I handed him his gloves and the swabs that he needed and put those in the solution.

2. What was the best/most interesting part of the experience?

It was awesome to see how Dr. Nall interacts with his patients. Most of the patients he saw he has been seeing forever and you can tell that even though he only sees them once a year he tries to keep up with them and know some kind of personal details.

3. Is a community nursing position something that you would consider working in? Why or why not?

I could definitely see myself doing something like this down the road. I feel like it is very relaxed but also still somehow extremely busy. It is probably not somewhere I would want to start out at because it honestly doesn't feel like you get to have a lot of time with each patient, and I would like to start out with a little more of that.

4. Do you feel like this community site met the needs of the population they serve? Why or why not?

I do feel that they met the needs of all of their patients. They were able to answer questions or get them set up with consults if needed.

5. Did you witness patient teaching? What general things were taught to this population? Do you feel that patient teaching in this community site was adequate? Why or why not?

I saw Dr. Nall do a lot of patient teaching. The thing he talked about the most was just the importance of getting a mammogram as well with their yearly appointments. He also took the time with each patient to address any specific questions or needs that they may have had. Because of all of that I do feel like his teaching was adequate.
