Why I Chose Nursing

There are a few reasons why I chose to pursue nursing. One reason is because my mom and dad were both registered nurses. Another reason is because I love helping and taking care of people. It makes me sad to see patients who are in need and to see their family members who are in pain. I hope to help these people and be able to show them love while they walk through their difficult times in life. This is a great opportunity for me and I am very excited to start pursuing nursing.
