

## Practice For LMS

Why I want to be a nurse was initially to have stability, as I have grown into my career my thoughts have changed; I love what I do. I feel like it's always something new that can be learned, every job and facility are different in procedures and protocol. What I can do in one place I may not be able to do in another. Nursing is a never-ending cycle of knowledge that stays with you no matter where you go, from me being the one to learn to showing others is an awesome feeling. I enjoy being around others who all have the same goal which is to care for others.
