

I would like to be a nurse to ensure the stability of my future and the future of the people for whom I am responsible. Being a nurse will not only ensure, hopefully, a better future, no matter how long or short, for not only my patients, but will also provide a career path that is as long and progressive as I choose. As a nurse, I will have the job security and financial stability to provide for my family while I am caring for the families of others.
