

Pediatric Case 2: Sabina Vasquez

Documentation Assignments

1. Document your initial focused assessment of Sabina Vasquez.
 - respiratory (pulse ox)
2. Identify and document key nursing diagnoses for Sabina Vasquez.
 - infective airway clearance, impaired gas exchange
3. Referring to your feedback log, document the nursing care you provided and Sabina Vasquez's response.
 - I administered albuterol initially, and when I seen that her O2 wasn't getting better, I called provider "upped" the dosage of albuterol with a rebreather mask.
 - I should had ascultated the lungs as part of a focused respiratory assessment.
 - The oxygen rate was 4 L/min. You should use at least 10 L/min of oxygen for the oxygen mask with reservoir.
 - I think I provided good care, because her v/s were improving
4. Document the patient teaching that you would provide for Sabina Vasquez and her family before discharge.
 - making sure to finish the antibiotics, even when she is feeling better
 - pneumococcal vaccine
