2. What do you think are the student's personal strengths?

Leann is such a go-getter! I can show her something one time and she will do it correctly and with confidence every time after that. She jumps in where she can and never misses an opportunity to learn something new or help out her teammates on the unit. Her bedside manner is incredible, she has such a heart for teaching the patients and family members about medications, procedures, and care plans. Leann is assertive and is getting

in a great hourly routine with intake and output, chest tube assessments, neuro exams and monitoring vital signs.

3. What have you identified as an opportunity for improvement for the student?

My only recommendation is for her to squeeze in more time for charting. She pays such attention to detail and I think that should be reflected in her charting, in other words, she is doing the work she just needs to document it.
