

**Instructional Module 6
Obstetrics Community Clinical Experience**

Community Site: Dr. Nall's Office

1. What did you observe during the day? Were there any specific procedures that were able to participate in or observe?

I observed Dr. Nall perform several annual wellness exams, pap smears, and pre-op visits. I also was able to observe him perform a uterine biopsy and speak with a patient about her mental health.

2. What was the best/most interesting part of the experience?

I feel like the best part of the day was just sitting in the office talking with Dr. Nall about his years of practice and learning new things about gynecology. He was very nice and tried very hard not only to teach me but his patients and I feel like that is the reason he is so well liked and sought after as a GYN.

3. Is a community nursing position something that you would consider working in? Why or why not?

I think that later in my career I would consider working about an OB-GYN office. It is definitely more laid back than the hospital and I feel like the environment was a lot more "homey" and welcoming than the hospital.

4. Do you feel like this community site met the needs of the population they serve? Why or why not?

Yes, I do believe they met the needs of the population. Dr. Nall was a huge advocate for getting people in and spending as much time with them as they needed. He made sure that everyone he saw had the right appointments set up for the future, and he made the patients feel heard and at peace.

5. Did you witness patient teaching? What general things were taught to this population? Do you feel that patient teaching in this community site was adequate? Why or why not?

Yes, I absolutely witnessed patient teaching. As I have said throughout this reflection, I was very impressed with Dr. Nall's teaching ability and how he took the time to explain things to the patients at length. Even when we were not in a room, Dr. Nall took the time to teach me about certain birth controls and different processes that occur in the female body. Honestly, I would consider making him my GYN just because he took the time to just talk with me.
