## **Instructional Module 6 Obstetrics Community Clinical Experience**

Community Site:

**Dr. Zavala**

1. What did you observe during the day? Were there any specific procedures that were able to participate in or observe?

**I observed several different Pap smears, and go to assist my handing Dr.Zavala the equipment as she performed the exam.**

**I also got to witness an IUD removal.**

**For the most part I just sat in while she finished patients charts and scheduled inductions and C-sections for her patients.**

2. What was the best/most interesting part of the experience?

**I believe the best part of this experience was watching Dr.Zavala educate her patients. She is super amazing at communicating with her clients, and an amazing educator.**

3. Is a community nursing position something that you would consider working in? Why or why not?

**I would possibly consider working in a clinic later in life, yet right now it doesn't seem to fit into my life right now. For the most part the nurses job is mostly paperwork and filing consents and I would like to gain more experience before moving into this field of work.**

4. Do you feel like this community site met the needs of the population they serve? Why or why

not?

**I believe that Dr.Zavala runs a very adequate clinic. Yet I don't believe there is enough in Lubbock Texas to serve the community. She herself already has 24 clients and is stretched thin, so there could always be more help.**

5. Did you witness patient teaching? What general things were taught to this population? Do you feel that patient teaching in this community site was adequate? Why or why not?

**I witnessed a lot of patient teaching, and Dr.Zavala excels at it. A lot of her teaching had to do with birth control, there were many women visiting that were pregnant with their 4th kid and was considering a tubal, and Dr.Zavala offered excellent guidance. It truly was amazing watching her navigate every situation, and offer unbiased guidance**
