

## School Nurse Experience Reflection Questions

1. How has your view of the student population changed?

My view of the student population has changed by when I was a student, I did not think that there would be many students going to the nurse to get thing check out because when I was a student, I did not see other students going to the nurse.

2. How has your view of the school nurse role changed?

My view of the school nurse has changed by seeing the nurse taking care of the student and how the nurse is showing sympathy for student because I thought the school nurse usually just sent the student home.

3. What surprised you about the school nurse experience?

What surprised me is I did not think that there would be many students showing up to the nurse office to get thing check out such as a small bump and the nurse told me that there is lots of broken bone because of playground.

4. What did you observe during your time there?

I observe the nurse giving out ice pack, giving medication to student and how passionate the nurse is treating the student.

5. How was your experience different from what you expected?

it was different from what I expected because I did not think that I could interact well with the student but it turn out that I interact well with them.

6. What are some of the needs/issues related to the health of the school age children that you may not have been aware of?

Some of the issue that I was not aware of was I did not realize that student at such a small age could experience anxiety because the nurse help one of the students to calm down when the student was crying.

7. Please list two developmental stages related to the population that you observed.

Erikson (psychosocial): industry vs inferiority

Kohlberg (moral): good boy, nice girl stage
