## Instructional Module 6 Obstetrics Community Clinical Experience

Community Site: Dr. David Blann

1. What did you observe during the day? Were there any specific procedures that were able to participate in or observe?

I spent the day interacting with postpartum and intrapartum patients. I took blood pressures all day and listened to fetal heart tones.

2. What was the best/most interesting part of the experience?

The best part was massaging patient's fundus and listening to fetal heart tones. It was nice to be able to practice skills all day.

3. Is a community nursing position something that you would consider working in? Why or why not?

I would possibly consider it because it's very slow and there isn't as much patient interaction other than at the beginning of the visit.

4. Do you feel like this community site met the needs of the population they serve? Why or why

not?

I felt like they did. The CMA and the RN were very attentive and as well as the Doctor. They were all polite & kind and readily answered any questions asked & and gave the best care.

5. Did you witness patient teaching? What general things were taught to this population? Do you feel that patient teaching in this community site was adequate? Why or why not?

Yes, I did witness patient teaching. The general things were daily weights, prenatal care, and finally just to report anything unusual. I felt as if the patients Adopted: October 2016 teaching was adequate. Most of the patients that were here for a regular checkup seemed comfortable and confident.
