

**Student name:** Lauren Caudill

**Date:** April 14th, 2023

**DAS Assignment:** #4

**Name of the defendant:** Angela Bond

**License number of the defendant:** 612655

**Date action was taken against license:** November 16, 2017

**Type of action taken against the license:** Warning with Stipulations

1. Use the space below to describe the events which led to the action(s) taken against the license. If multiple charges were in play, be sure and cite them, e.g. drug diversion, HIPPA violation, abandonment, forfeiture on student loans, etc.

**ANSWER:** Mrs. Bond was employed as a registered nurse at Innovations Health Services, in Tyler Texas, when she inaccurately documented in a patients medical records. Mrs. Bond falsely mentioned another male nurses name as a witness on a controlled substances in the patients medical record, when this other nurse did not actually witness this controlled substance being disposed. She also inaccurately documented about giving report to this other male nurse at 6:01, however this male nurse was not even in the same facility at the time. He did not clock in into 6:53 and received report from this patients mother.

2. Use the space below to provide a description of measures you think could have prevented any action being taken against the license and/or would have prevented harm to the patient, if harm occurred.

**ANSWER:** I think Mrs. Bond could have prevented any action being taken against her license, if she wouldn't have lied and falsely documented in the patients medical record about having a witness on this controlled substance. Also not falsely documenting about giving report to this fellow nurse, when he was not even in the same facility. Now she knows, but she should have thought about the fact that the charge nurse could have easily went and looked to see, if that fellow nurse was even there at the time by looking to see when he clocked in that day.

3. Identify which universal competencies were violated and explain how.

**Answer:** The universal competencies that were violated: The first universal competency would be **safety and security (physical)** because she did not follow the 7 rights for medication administer ( inaccurate documentation). The second universal competency that was violated would be **critical thinking:** This nurse did not critically think on the fact that they can see when this fellow male nurse clocked in that day.

4. Use the space below to describe what action you think a prudent nurse would take as the first person to discover the event described, in other words, you are the one who discovers the patient has been harmed by the nurse or you have discovered the impairment or criminal activity cited in the disciplinary action.

**Answer:** As a nurse witnessing this I would have first confronted the nurse on why exactly she is falsely documenting in a patients medical record on a witness for a controlled substance. Then I would have stated how she needs to go tell the charge nurse exactly how she falsely documented about a male nurse witnessing her dispose of a controlled substance. Also how she stated in the medical record that she gave this oncoming nurse a report at 6:01 and he was not even clocked in until 6:53 and received the report from the patients mother.
