ECG Practice

Identify this rhythm Paroxysmal Supraventricular Tachycardia

Calculate heart rate 200 beats/min

What nursing actions will you take IV adenosine, IV β -adrenergic, calcium channel blockers, vagal stimulation, DC cardioversion

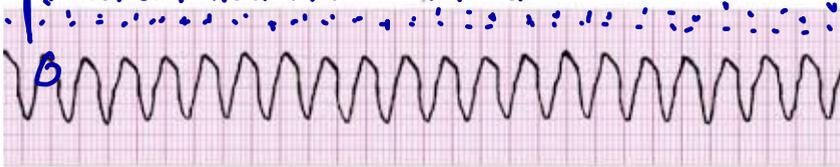

Identify this rhythm Ventricular tachycardia

Calculate heart rate 210 beats/min

What nursing actions will you take

VT w/ pulse (stable) treated with antiarrhythmics or cardioversion
pulseless vt treated w/ CPR + rapid defibrillation

Identify this rhythm Sinus bradycardia

Calculate heart rate 60 beats/min

What nursing actions will you take

take administer atropine, pacemaker therapy may be required, if bradycardia is due to drugs they may need to be held or discontinued
