Instructional Module 6
Obstetrics Community Clinical Experience

Community Site: Winn

1. What did you observe during the day? Were there any specific procedures that were able to participate in or observe?

I was able to see breast exams, pap exams, Birth control follow ups, and scheduling labs. I did not get to actively participate much but was able to see quite a bit.

2. What was the best/most interesting part of the experience?

Seeing a Cervix was interesting because I did not think it would be so obvious or so close to the vaginal opening. They were also a lot faster than expected.

3. Is a community nursing position something that you would consider working in? Why or why not?

At this time in my life I would prefer something that gives me more experience but maybe later in life when I am looking for a slower pace.

4. Do you feel like this community site met the needs of the population they serve? Why or why not?

Yes, they provided education, labs, exams, follow-up appointments, and referrals for anything the women needed.

5. Did you witness patient teaching? What general things were taught to this population? Do you feel that patient teaching in this community site was adequate? Why or why not?

I witnessed a lot of teaching. The NP taught about vaccines, annual exams, Electrolyte + Vitamin balance, and much more with her patients. The teaching seemed adequate for these women.
