Instructional Module 6
Obstetrics Community Clinical Experience

Community Site: STD Clinic

1. What did you observe during the day? Were there any specific procedures that were able to participate in or observe?

During the day I observed the number of patients coming in for testing and I watched the nurse do blood drawn and educate patients on how to do vaginal swab and wet prep. I was able to do blood drawn, HIV testing and observe the nurse to do vaginal and rectal swab.

2. What was the best/most interesting part of the experience?

The most interesting part of the experience is getting to watch the lab technician put the wet prep under the microscope and look for what organism is present.

3. Is a community nursing position something that you would consider working in? Why or why not?

Community nursing is something that I would not consider working in because the pace of the job is a bit too slow for me.

4. Do you feel like this community site met the needs of the population they serve? Why or why not?

I feel like this community site met the needs because syphilis is on the rise and the clinic provide the test and is helpful in detecting and it help the community to better understand and prevent syphilis.

5. Did you witness patient teaching? What general things were taught to this population? Do you feel that patient teaching in this community site was adequate? Why or why not?

I did observe patient teaching and the general things were taught is using protective measurement while having intercourse and both partners should get tested if planning on having a child. Yes, I feel like the teaching was adequate because not everyone in the community using protecting measurement while having intercourse.
