**Instructional Module 6**  
**Obstetrics Community Clinical Experience**

Community Site: Bridget Winn FNP (Betty Wiebe, 8/30/2023)

1. What did you observe during the day? Were there any specific procedures that were able to participate in or observe?

I did not participate in any procedures, but I observed multiple pap smears and breast exams while I was at the clinic today.

2. What was the best/most interesting part of the experience?

I think the most interesting part of the experience was seeing the instruments that they use to do pap smears. I also thoroughly enjoyed following the Nurse Practitioner and learning from her. Bridget Winn was incredibly insightful and knowledgeable when it came to helping these women that came in.

3. Is a community nursing position something that you would consider working in? Why or why not?

I think community nursing is something I could be interested in later in my career. As I am starting my nursing career, I want to be able to experience and learn different things that I wouldn't really be able to in a community setting.

4. Do you feel like this community site met the needs of the population they serve? Why or why not?

This site serves women from all age ranges, and I felt like all the patients that came in had needs that were adequately met. The nurse practitioner was very conscious of the cost of everything and the medications she was providing, which was very appreciated by the patients.

5. Did you witness patient teaching? What general things were taught to this population? Do you feel that patient teaching in this community site was adequate? Why or why not?

I did witness a lot of adequate patient teaching about menopause, contraception, and testing that should be done for women as they get older. The teaching tied into what each patient was experiencing.
