

# Covenant School of Nursing

## Disciplinary Action Summary Assignment

### Instructional Module 2

Student Name: Jessie Espinoza      Date: 9/1/23

DAS Assignment # 3

Name of the defendant: **Robby Lynn Forbes**

License number of the defendant: **756958**

Date action was taken against the license: **8/11/15**

Type of action taken against the license: **Revoked**

*Use the space below to describe the events which led to the action(s) taken against the license. If multiple charges were in play, be sure and cite them, e.g. drug diversion, HIPAA violation, abandonment, forfeiture on student loans, etc.*

#### **Charge 1 & 2 – Engage sexual contact with child by touching breasts and Vaginal area.**

*Use the space below to provide a description of measures you think could have prevented any action being taken against the license and/or would have prevented harm to the patient, if harm occurred.*

**Measures taken would have been remaining professional, taking another nurse to access a patient. I think not working in the field of nursing would have been better for the patient and Forbes. Everyone knows in the line of work, nurses do have to accommodate the patient and their body in a professional manner. Nurses are to heal not hurt patients.**

*Identify which universal competencies were violated and explain how.*

- **Safety & Security was broken by engaging sexual contact.**
- **Human Caring was broken by not respecting the dignity and traumatizing a pt that is child.**
- **Professional Role of not being a nurse and simply just hurting the pt.**

*Use the space below to describe what action you think a prudent nurse would take as the first to person to discover the event described, in other words, you are the one who discovers the patient has been harmed by the nurse or you have discovered the impairment or criminal activity cited in the disciplinary action.*

**If I suspect my coworker being inappropriate with patients and staff I will notify charge nurse and nurse manager because a hospital should be a safe environment for both patient and employees.**
