Disciplinary Action Summary Assignment

Instructional Module 2

Student Name: Veronica Ponce Date: 9/9/2023 DAS Assignment # _____4____ (1-4)

Name of the defendant: Shairon Lee Jordan License number of the defendant: 793724

Date action was taken against the license: 4/21/2014.

Type of action taken against the license: Warning with Stipulations

Use the space below to describe the events which led to the action(s) taken against the license. If multiple charges were in play, be sure and cite them, e.g. drug diversion, HIPAA violation, abandonment, forfeiture on student loans, etc. On or about July 4th-5th, RN Shairon failed to administer hydralazine to a patient for high blood pressure, failed to notify physician when the systolic blood pressure was higher than 180, and RN Shairon failed to document the patients pain assessment on the flow sheet.

Use the space below to provide a description of measures you think could have prevented any action being taken against the license and/or would have prevented harm to the patient, if harm occurred. If RN Shairon had notified the physician of the patient blood pressure and the patient's jaw pain, and documented it accordingly, subsequent caregivers would have complete and accurate information to treat the patient correctly.

Identify which universal competencies were violated and explain how. I believe documentation was violated. RN Shairon failed to notify the physician of the patient's status, failed to document communication with the physician regarding a patients complaint and also failed to document administration of a medication on the medication administration record.

Use the space below to describe what action you think a prudent nurse would take as the first to person to discover the event described, in other words, you are the one who discovers the patient has been harmed by the nurse or you have discovered the impairment or criminal activity cited in the disciplinary action. I would notify the physician immediately to make sure the patient got the proper treatment and notify the charge nurse or immediate supervisor.
