<p><b>Step 1 Description</b></p> <p>I got to go to the L&amp;D unit on Wednesday. It was very slow and no one was progressing. I was finally able to see a C-section towards the end of the day. I also saw a foley bulb put in.</p>	<p><b>Step 4 Analysis</b></p> <p>Again it was very quick process. The nurse I was with was very willing to teach me. The mom also seemed scared at times even though she had a C-section before. It is quicker than actually pushing the baby out, but the nurse was telling me that it is not always necessary. It also look so brutal and if given the option I rather not have a C-section unless it is an emergency.</p>
<p><b>Step 2 Feelings</b></p> <p>I was upset at first that nothing was happening and we would not get to see anything. When I went to go see the C-section I was so happy. It was so interesting how fast it all happens.</p>	<p><b>Step 5 Conclusion</b></p> <p>I really liked the L&amp;D unit and all the staff. They were willing to teach and get us involved in what we could. I felt bad that Krystal and Molly did not get to see anything. I learned a lot from the transitional nurse and I enjoyed seeing everything we learned in pedi in this baby.</p>
<p><b>Step 3 Evaluation</b></p> <p>I got to go with the nurse that takes care of the baby right after it is born. We got her footprints and measurements. We also took lots of pictures for the parents. The mother was bleeding more than usual but they were able to stop it and sewed her up quickly.</p>	<p><b>Step 6 Action Plan</b></p> <p>I had a good time on the unit. I wish we had more time on the unit. I want to be like the nurses I met and how they acted towards us. We do not always get treated so nice.</p>
