	Psychosocial:	Attention seeking behaviors. Mood is labile. Affect congruent. No overt acting out or aggression.				
	Other:					

Patient Report—cont'd

	Labs and diagnostics:	CBC with differential and basic metabolic panel—all labs normal. Urine drug screen positive for marijuana. HcG negative.
Assessment	Nurse's assessment:	Tessa has been attempting to split staff by making derogatory comments towards nursing staff then apologizing for her behaviour. She is requesting special privileges to smoke. No evidence of infection related to wrist lacerations. Reports that acetaminophen given at 0600 reduced pain to 2 from a level of 6. Cuts on wrists and show no evidence of infection. She slept 6 hours last night.
Recommendation	Plan of care:	Monitor patient's behavior and keep her safe.
	Tests/results pending:	None
	Orders pending completion:	None
	Other:	I thought I heard her yelling, so please go check on her.
