Instructional Module 6  
Obstetrics Community Clinical Experience

Community Site: Dr David Blann clinic

1. What did you observe during the day? Were there any specific procedures that were able to participate in or observe? Pregnancy visit

- Weight on all patient

- Fetal Heart rate monitoring on twin pregnancy.

I participated on Weighing patient, vital signs check,

- Leopold and Listen to Fetal heart beat.

2. What was the best/most interesting part of the experience?

My best moment was listening the baby heart beat

3. Is a community nursing position something that you would consider working in? Why or why not? I enjoyed my day at the doctor office, but it is

not something I may consider working in because of the hourly. I preferred working 3 days of 12 hrs than having to go to work Monday through Friday.

4. Do you feel like this community site met the needs of the population they serve? Why or why not? Yes, Nurses and the Doctor were very organized

and the wait time was not long between patients.

5. Did you witness patient teaching? What general things were taught to this population? Do you feel that patient teaching in this community site was adequate? Why or why not?

I witness a lot of teaching on signs that should alert moms. They were told to drink cold water if the baby is ~~not~~ moving, to report any bleeding, Report any sudden loss of water, to called if the baby stop moving or if not moving as usual, and also to report any acute headache that persist with rest.
