### Pediatric ED Reflection Questions

COVID/RHINO VIRUS

1. What types of patients (diagnoses) did you see in the PED? *FACE ON COFFEE TABLE SEIZURES x3 ASHMA flare UP*
2. The majority of the patients who came in to the PED were from which age group? Was this what you expected? *15-19 mo., 14-17 year olds*
3. Was your overall experience different than what you expected? Please give examples.
4. How did growth and development come into play when caring for patients (both in triage and in treatment rooms)?
5. What types of procedures did you observe or assist with?
6. What community acquired diseases are trending currently? *COVID, RHINO VIRUS (RESPIRATORY) PSV*
7. What community mental health trends are being seen in the pediatric population?
8. What patient population is the most vulnerable?
9. What is the process for debriefing after a traumatic event?
10. If someone donated \$100 million to the PED, what would you change?
11. What is the process for triaging patients in the PED? *sign in at counter -> triage room &*
12. What role does the Child Life Specialist play in the PED? *wait or pulled back into ROOM*

#1 I saw mainly respiratory illness such as COVID/RHINO VIRUS/PSV. I also saw a pt with IYSSOI sprayed in the face, one sent by PCP for Kawasaki Disease and a bunch of seizure/ear infections.

#2 majority was 15-19 mo or 14-17 yr olds, not what I expected at all. I thought it would be babies or school-age children.

#3 I had a better experience than I thought I would have. I enjoyed the kids way more than I thought and I got to see such a variety of patients. I didn't expect all the seizure pts & felt I got to see a good comparison to what an adult would be like. They work on the unit as a team which I really enjoyed.

#6 COVID, RSV, RHINO VIRUS are trending currently

#11 sign in with registration -> triage room w/ triage nurse for V/S & TX -> wait in lobby or taken back to pt room depending on unit flow
